SUPPLEMENTARY INFORMATION:

I. Abstract

This request is for an extension of a current information collection. Under the Magnuson-Stevens Fishery Conservation and Management Act (MSA), the Secretary of Commerce has the responsibility for the conservation and management of marine fishery resources. We, National Oceanic and Atmospheric Administration's (NOAA) National Marine Fisheries Service (NMFS), and the Regional Fishery Management Councils are delegated the majority of this responsibility. The New England Fishery Management Council (Council) develops management plans for fishery resources in New England.

In 2010, we implemented a new suite of regulations for the Northeast (NE) multispecies fishery through Amendment 16 to the NE Multispecies Fishery Management Plan (FMP). This action updated status determination criteria for all regulated NE multispecies or ocean pout stocks; adopted rebuilding programs for NE multispecies (groundfish) stocks newly classified as being overfished and subject to overfishing; revised management measures, including significant revisions to the sector management measures (established under Amendment 13) necessary to end overfishing, rebuild overfished regulated NE multispecies and ocean pout stocks, and mitigate the adverse economic impacts of increased effort controls. It also implemented new requirements under Amendment 16 for establishing acceptable biological catch (ABC), annual catch limits (ACLs), and accountability measures (AMs) for each stock managed under the FMP, pursuant to the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act).

Sectors are a management tool in the NE groundfish fishery. A sector consists of three or more limited access NE multispecies vessel permits, with distinct ownership, who voluntarily enter into a contract to manage their fishing operations and to share liability. A sector is granted an annual allocation of most stocks of fish managed by the NE Multispecies FMP. In return for increased operational flexibility, such as exemptions from certain effort controls and the ability to pool and trade quota, sectors have additional reporting and monitoring requirements. The sector reporting and monitoring requirements, as established by Amendment 16 and revised by subsequent framework adjustments to the NE Multispecies FMP, are contained within this information collection.

II. Method of Collection

Respondents must submit either paper forms via postal service, or electronic forms submitted via the internet or a vessels' vessel monitoring system (VMS).
